DECIMAL UNITS

As the Metric System of Weights and Measures grows in universal favor, the need of a uniform decimal currency and of a decimal system of time measurement is becoming generally felt. Most countries already possess some form of decimal money, and even England is waking up to the advantages of decimal units. A recent scheme for decimalizing the pound sterling was well supported, the plan being to adopt the mill as the unit and divide the sovereign into 1,000 mills, thus making the half-sovereign equal 500 mills, the crown 250. the double florin 200, the half-crown 125, the florin 100, the shilling 50, and the sixpence 25. PNEUMONIA EXPLAINED. It is generally supposed that pneumonia is due to the accidental penetration of specific microbes into the system, but the observations of M. Jaccoud, a French student of the subject, show that the disease really results from the development under favorable conditions of microbic germs permanently present in the system. A chief condition of such development is a sudden chill, which explains the frequent coincidence of lung affections with abrupt changes of temperature.

A DEVELOPING ART. Probably no application of science is advancing more rapidly than photography. Among recent appliances is a detective camera in the form of a watch, with a charm to hold a supply of miniature dry-plates, and a telescopic camera ture dry-plates, and a telescopic camera ceptional risk from criminal operations in which distant objects are brought and that the size of the lot places this near, by telescopic aid, and photographed. Modern dry-plates have made the camera quite available at night, and moonlight and even by starlight.

SAN FRANCISCO POSTOFFICE SITE.

An Entire Block is Needed.

The commissioners appointed by the President to select a site for a new postoffice building in San Francisco have forwarded the following report to the Secretary of the Treasury. It is a document which will be read with considerable interest by the citizens of the PUBLIC BUILDING SITE COMMISSION, SAN FRANCISCO, Nov. 26, 1887. To the Secretary of the Treasury:

The commissioners for selecting a site for a public building at San Francisco under the Act of Congress of March, 1887, respectfully make the following report: That in view of the present and future importance of San Francisco, as shown by the fact that in population it ranks as the tenth among American cities, as the fourth in the amount or business transacted through its post decade into 10 minutes, the minute into office and third as to the value of its importations and the revenue collected at its Custom House, it would seem to be Similar units take the place of the wise and prudent on the part of the ble, sufficient provision of ground, for

> lie business. That the premises now occupied by the Custom House, the Postoffice and the Internal Revenue Department and the Federal Courts do not afford more room than is needed to fairly and conveniently accommodate the custom ser

buildings in which to carry on the pub-

vice alone. That the business of the Pension Of fice is now carried on upon the fourth floor of a private building, for which high rent is paid; that the room is upsufficient and the location inconvenient, That the building occupied by the

Sub-Treasury is altogether insufficient in capacity to properly transact the business of the Department. That it is not only tool small for the purpose, but at the same time covers the entire surface of the lot upon which it is situated, its outer walls, if not its very vaults, abutting upon private property and against the walls of private buildings, in such manner as to subject the Goverament funds deposited there to exfault beyond remedy.

That the growth of the city within the last few years has changed the centres of business so as to leave the present exquisite pictures are now taken by Government building in a location most inconvenient for any purpose except that of a Custom House, if it be even be well situated for that.

It is the opinion of the Commissioners business, probably, should be provided for in the building under consideration. That the new building should be located near the present business center of the city, and should be as nearly as possible surrounded on all its four sides

by public streets.

That a suitable building site for such should contain an area of not less than from 90,000 to 120,000 superficial feet.

The Commissioners have further to eport that they have industriously and faithfully, by all reasonable and proper means, endeavored to find and procure for the Government such a site at a movement, was shown by a rise or fall price within the amount of money apin the liquid in the narrow neck of the propriated and allowed for that purpose poised, he has found that one's thoughts main so, and that in their opinion no may be literally weighed, and that even suitable site can be found for said sum

In conclusion the Commissioners beg
